Washington State University

Advance Notice
For
Design Build Services
Life Science Building
Vancouver, WA

6/9/2020

Washington State University, Facilities Services, will be issuing a RFQ in July 2020 for the purposes of identifying Design/Build teams for the Vancouver Life Science Building. The rough project scope is to provide a new instructional and research facility that will provide cutting edge learning opportunities. Integrating teaching and research labs in one building for students in STEM disciplines.

Complete information regarding this project will be posted to http://facilitiesservices.wsu.edu/consultants.aspx, once the RFQ is advertised. No further project information is available at this time.
